

UPPER MACUNGIE TOWNSHIP

Gas Fireplace / Decorative Heating Appliance Submittal Guide

All work shall meet all provisions of the 2015 International Residential Code, including the Mechanical Sections.

Please utilize the checklist below before submitting an application:

Provide a brief description or scope of work detailing this project.

Provide the product, model number & manufacturer's installation instructions for all equipment to be used in this installation.

Provide the manufacturer's installation details showing clearance from combustibles and the required hearth extension distances for the specific fireplace or heating appliance.

Distance from air intakes or openings, minimum vent pipe sizing & distance from combustibles, maximum horizontal & vertical runs with minimum required pitch of venting permitted, vent termination location, height & specifications, etc.

Product UL or other product listing allowing installation of this gas fireplace/heating appliance in the alcove or location proposed.

Show all details for the fuel gas system installation including adequacy of the existing meter & piping to accommodate the new appliance flow values, type of required piping, listing for use with the specific device, location of the gas shut off within 6 feet of the unit, details for fire blocking the gas pipe penetrations where the gas pipe is run between levels or rated locations of the home, bonding of the gas piping system including flexible gas piping or CSST gas piping per the manufacturer's installation instructions.
